2018 Edition

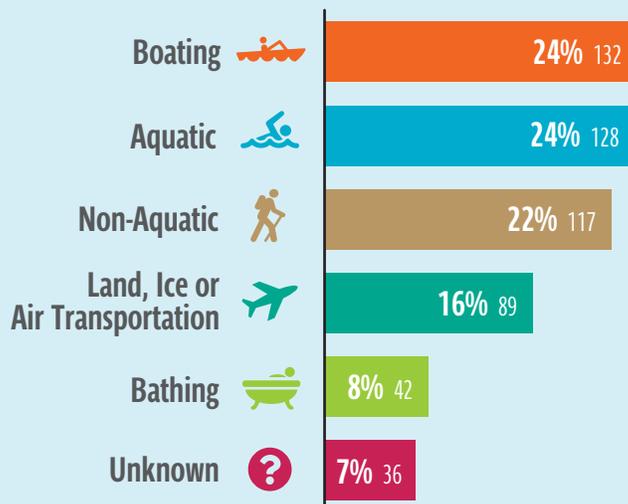

Fatal Drowning Victims Involving Alcohol and/or Drugs - Canada 2006-2015

Fatal Drowning Victims Involving Alcohol and/or Drugs by Gender 2006-2015

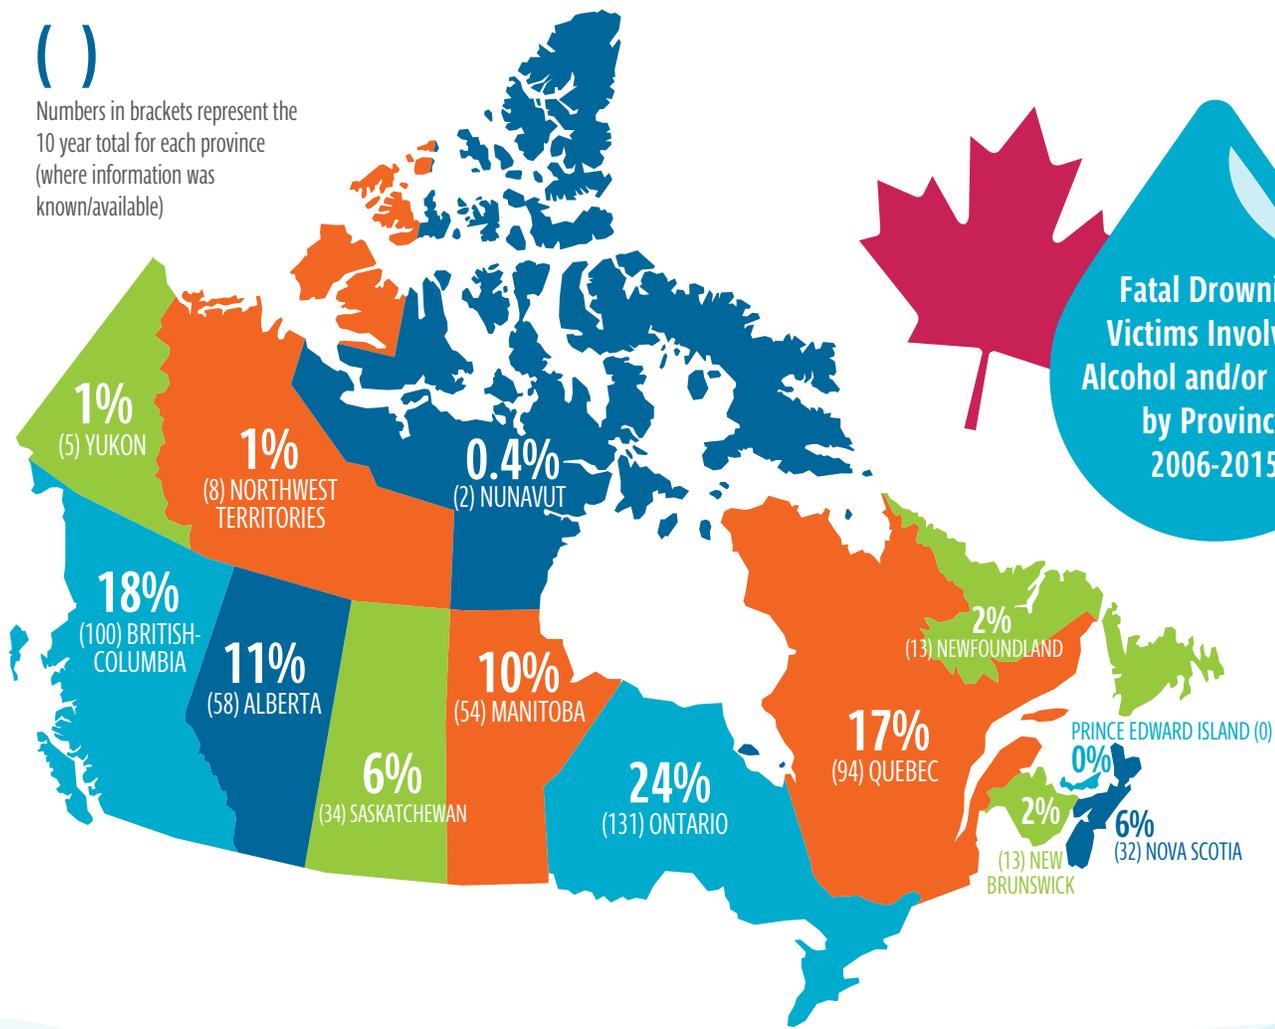

Fatal Drowning Victims Involving Alcohol and/or Drugs by Activity Type 2006-2015

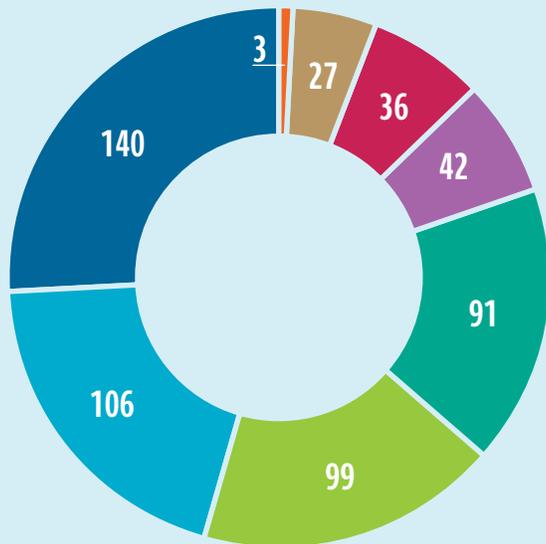

()

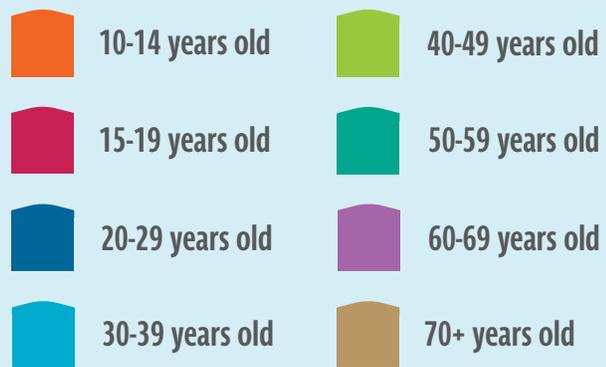

Numbers in brackets represent the 10 year total for each province (where information was known/available)

Fatal Drowning Victims Involving Alcohol and/or Drugs by Province 2006-2015

Fatal Drowning Victims Involving Alcohol and/or Drugs by Age Group 2006-2015

METHODS:

Water-related death data is extracted from the office of the Chief Coroner or Medical Examiner for each province and territory. Data is collected for all deaths resulting from incidents "in, on or near" water. "Near water" incidents were included if the intent was closely related to water-based recreational, vocational or daily living activity. The data includes only unintentional deaths, not deaths due to natural causes, suicide, or homicide.

ACKNOWLEDGEMENTS:

We gratefully acknowledge the support, co-operation and efforts of:

- The Chief Coroner's and Medical Examiner's Offices in each province/territory, who permitted and facilitated confidential access to coroner's reports on unintentional water-related deaths.
- The volunteers who contributed their time and energy to extract data from the files.

The Drowning Prevention Research Centre is the lead agency for drowning and water-incident research in Canada.
